Why InDesign?

InDesign is the industry standard page layout software for demanding workflows, creating rich and complex documents, from single page advertisements and flyers to complex multi-page colour publications.

About The Course

This 3 day course aims to equip participants with the technical skills required to create full-colour, multi-page digital artwork for print. Starting with text frames, formatting, graphics and links, colours and libraries, students then move onto styles, layers, master pages, and templates. Instructors also show students how to generate book files and prepare documents for print and other media.
